

Microsoft 365 Copilot Empowerment Assessment

People-First AI Adoption

Artificial intelligence (AI) is rapidly changing the way we work. Some organizations embrace AI-powered innovation and thrive, while others struggle to find the right path.

At Compugen Systems Inc., we support our clients through a multi-step M365 Copilot adoption journey to deliver top-notch employee and customer experiences. We architect tailored solutions to help you lay the foundation for business breakthroughs.

Nearly
70% of the
Fortune 500
now use Microsoft 365 Copilot.

LET'S TRANSFORM YOUR IT EXPERIENCE

The M365 Copilot Empowerment Assessment builds on insights from your Vision + Value Workshop with a detailed assessment to ensure your technical environment, teams, and business processes are ready for AI adoption.

INNOVATE

Understand the specifics of your platforms, tools, and infrastructure — setting the foundation for innovation.

Conduct an M365 licensing evaluation, a data access audit, and a data security deep-dive to assess your Microsoft environment, compliance, and governance.

INSPIRE

Identify opportunities for harnessing the power of M365 Copilot to help your team flourish.

Engage IT and business stakeholders to outline priorities.

Meet with your leaders to solidify business drivers, define desired outcomes, and identify potential obstacles to adoption.

IMPACT

Deliver a detailed roadmap that sets the stage for implementing Proof of Concept, the final stage in your curated AI journey.

Provide a prioritized set of deployment recommendations, offering insights to guide experimentation with M365 Copilot.

We Dream Big With You

This assessment will help you unlock insights, identify opportunities, and pave the way toward your personalized AI adoption.

1

Ensure initial workshop recommendations meet your people, process, and platform requirements.

2

Create real-world, AI-powered scenarios to understand critical M365 Copilot implementation steps.

3

Chart a detailed path forward, focusing on business areas where M365 Copilot will have the most impact.

4

Adopt a human-centric, pragmatic, and holistic approach to technology planning to maximize your ROI.

5

Realize new possibilities and support sustainable outcomes with curated insights for AI adoption.

6

Evaluate technology and people readiness, including licensing, data lifecycle, security, governance, and more.

Your Experience ArchiTECH

With our experts by your side, you're not just moving to implementation. Instead, you'll become intelligence-enabled and culture-optimized. **Experience our infrastructure transformation skills and collaborative approach.**
